

Protection at Your Fingertips

Protection First Nursing / Home Care Door Caddy allows for easy access to PPE with two upper pockets and one large, lower pocket (with a clear front to display special instructions). This isolation door caddy is ideal for use in nursing facilities or at home.

The Nursing / Home Care Door Caddy helps meet CDC recommendations for standard, airborne, droplet and contact isolation compliance. It also facilitates compliance with fire, logistic and regulatory codes by replacing bulky and obstructive carts at bedside and in hallways. For home use, it allows for quick and easy access to PPE in bathrooms, entryways and more. It is made of flame-resistant, 420-denier urethane-coated nylon (passes CA117E fire test).

The Nursing / Home Care Door Caddy comes with two universal-fit metal door hangers and two adjustable straps to position medical supplies at the most convenient height on any door. The caddy can be mounted using track mounting, suction cups that support 20 pounds (for glass doors and smooth surfaces), outside wall mounting and swivel clasps.
